## SKILLS

**Languages:** C, C++, JAVA, Python

**Tools:** DeepFace, Docker, MySQL, OpenCV, PyTorch, TensorFlow, YOLO, Flask, CSV, HTML, CSS

**Platforms:** Amazon Web Services (AWS), Git, GitHub, Google Colab, Jupyter, Tableau, VS Code

**Soft Skills:** Adaptability, Problem-Solving, Teamwork, Leadership

## PROJECTS

**AI-Powered Assistive Vision System | [GitHub](#)** Feb' 26 - May' 26

- Developed an AI-powered assistive vision system with 10 computer vision features, including object detection, OCR, face and emotion recognition, currency detection, and voice feedback.
- Built a real-time computer vision pipeline using Python, OpenCV, and YOLO for image analysis and object detection.
- Applied deep learning and computer vision techniques to develop real-time assistive AI solutions, integrating Text-to-Speech (TTS) for voice-based feedback from detected objects and extracted text.

**Tech Stack:** Python, OpenCV, You Only Look Once (YOLO), TensorFlow

**Automated Attendance System | Smart India Hackathon (SIH) 2025 | [GitHub](#)** Aug' 25

- Developed an AI-powered automated attendance system to identify and record student attendance using real-time facial recognition, reducing manual effort and improving attendance tracking efficiency.
- Designed and implemented a Flask-based facial recognition pipeline using Python, OpenCV, and DeepFace for real-time image processing and automated attendance recording.
- Integrated Flask with the computer vision pipeline for real-time attendance management, tested the facial recognition system across 50+ student images, and contributed to system development, testing, and optimization during Smart India Hackathon (SIH) 2025.

**Tech Stack:** Python, OpenCV, DeepFace, Flask, CSV, HTML, CSS

## TRAINING

**Applied Artificial Intelligence & Machine Learning | LPU | [Certificate](#)** Jun' 26 – Jul' 26

- Completed 6 core ML modules covering data preprocessing, feature engineering, classification, regression, clustering, and hyperparameter tuning using Python, Pandas, NumPy, and Scikit-learn.
- Developed PlaceMint AI, an ML-based placement prediction and resume analysis system with 6+ analytical and visualization features.
- Applied 20+ Machine Learning algorithms and techniques and gained hands-on experience with 10+ model-evaluation and optimization methods, including cross-validation, Grid Search, Random Search, Accuracy, Precision, Recall, F1-Score, ROC-AUC, and clustering evaluation metrics.

**Tech Stack:** Python, Matplotlib, Jupyter Notebook, Pandas

## CERTIFICATES

- Generative AI for Beginners | [Udemy](#) Aug' 26
- Database Management System | [Infosys Springboard](#) Jul' 26
- Data Structures and Algorithms | [iamneo](#) Jun' 26
- Data Visualisation: Empowering Business with Effective Insights | [Tata](#) Mar' 25
- Python with Libraries | [Skillera](#) Jan' 25

## EXTRACURRICULAR ACTIVITIES

- Vice President, Orators Arena | Leadership & Public Speaking | LPU Aug' 25 – Present
- Cyber Security Awareness Volunteer, WNS Cares Foundation | [WCF](#) Jun' 25 – Jul' 25

## EDUCATION

**Lovely Professional University** Phagwara, Punjab  
Bachelor of Technology Aug' 24 – Present  
Computer Science and Engineering; CGPA: 8.45

**Krishnanand Memorial Academy** Munger, Bihar  
Intermediate Mar' 22 – May' 24  
PCM; Percentage: 64%

**Saraswati Vidya Mandir** Munger, Bihar  
Matriculation Mar' 20 – May' 22  
Percentage: 84.4%
